CAROLINA THEATRE

Admission 5 and 10c.

Malaria or Chills & Fever

Prescription No. 668 is prepared especially for MALARIA or CHILLS & FEVER. Five or six doses will break any case, and if taken then as a tonic the Fever will not return. It acts on the liver better than Calomel, and does not gripe or sicken. 25c.

Constipation Causes Sickness

Don't permit yourself to become constipated, as your system immediately begins to absorb poison from the backed-up waste matter. Use Dr. King's New Life Pills and keep well. There is no better safeguard against illness. Just take one dose to-night. 25c. at your Druggist.

Alsatian Potash Salts.

Kali, or potash salts, in natural deposits, was discovered in Alsace in 1904, when deep borings were being made in the hope of striking oil. In 1909 the first kali mining shaft was completed in this district, and the following year 37,000 tons of kali salts were extracted. Since then other mines have been developed and the work has grown rapidly. Twelve mines are now in operation in this district.

Things of Real Worth.

When a man begins looking at the clock, when the main thing is to get the largest possible output in the shortest possible time, industrial art takes flight. It returns only when further developments in culture make it impossible for the race to remain satisfied with machine-made surroundings; when the clock is once more turned to face the wall, and man once more sets himself an ideal of beauty and worth, rather than of speed.

Few People Walk Properly.

The importance of a graceful carriage can hardly be overestimated. Few people walk properly and well. One's walk should be easy, graceful, and, above all, natural. Do not turn the toes in, but take firm and decided steps. Do not bring the heels down with a thump at each step, but have them moderately long and quiet. A well-known writer says, "Whoever carries the chin close to the neck is all right from top to toe and will walk well."

Ants Bake Bread.

Ants have been found in Dalmatia that actually make bread by chewing seeds into pulp, forming it in loaves, baking them in the sun and then storing them away for future use.

SOME DON'T'S For Stomach and Liver Sufferers

Don't take medicine for your Stomach ailments morning, noon and night, as usually such medicines only give temporary relief and simply digest the food that happens to be in the Stomach. Don't permit a surgical operation, as there is always serious danger in operations and in many cases of Stomach, Liver and Intestinal Ailments the knife can be avoided if the right remedy is taken in time.

Don't go around with a foul smelling breath caused by a disordered Stomach and Liver, to the discomfort of those you come in contact with. If you are a Stomach Sufferer don't think you cannot be helped, probably worse cases than yours have been restored by May's Wonderful Stomach Remedy.

Most stomach ailments are mainly caused by a catarrhal condition of the mucous membrane. May's Wonderful Stomach Remedy not only removes the catarrhal mucus but also the chronic inflammation and assists in rendering the entire alimentary and intestinal tract antiseptic, and this is the secret of its marvelous success.

Don't suffer constant pain and agony and allow your stomach ailments to physically undermine your health. No matter how severe your case may be or how long you have suffered—one dose of May's Wonderful Stomach Remedy should convince you that you can be restored to health again. May's Wonderful Stomach Remedy has been taken and is highly recommended by Members of Congress, Justice of the Supreme Court, Educators, Lawyers, Merchants, Bankers, Doctors, Druggists, Nurses, Manufacturers, Priests, Ministers, Farmers and people in all walks of life.

By CORA WEEMS.

"As for that," said the girl with the box of chocolates, "there are simply lots of things about myself that I'd like to change if I had the chance. Now, I've never liked my nose. As a mere child I hated it and since I've grown up my feeling in regard to it is desperately unchristian. It's such a mean nose—it's too long and it is fat at the end, and there's no way of disguising it. It's a ruinous nose!"

"Oh, mercy!" said the girl who was helping the other girl dispose of the candy. "I wouldn't feel that way about it! Why, after one gets used to it one never notices it, really! Constantly, if you are careful to keep your head turned so that people don't get a profile view—"

"Yes, that'll help a lot," broke in the girl in blue serge. "Looking straight at you one can't see how fat the tip of your nose really is, dear. And I've seen noses so much worse—all over a person's face! Of course, your nose is small, and that makes your nose more prominent. But I shouldn't feel so bad about it—if I forget our afflictions so much easier—"

"Well, I think you have a lot of nerve to call my nose an affliction!" cried the girl with the chocolate. "You talk as though I were a side-show freak, at the very least! Of course, it has its faults, but it isn't such an impossible nose, I'd have you know! I suppose I notice it more than any one else does, and I must say, Kitty Phipps, that if I were you I wouldn't talk!"

"I suppose you are insinuating something about my complexion!" said the girl in blue serge. "You've heard me mourn over it often enough and say I'd give my head if I could change it. I'm not claiming to be a beauty and I know there are sometimes a few tiny spots on my face—"

"Tiny!" cried the girl with the chocolates. "My goodness! I never saw any one with more things the matter with her face! If it isn't broken out it is yellow-spotty or just a gray-brown color—"

"Yes, I've noticed that," eagerly broke in the girl in brown. "How funny Kitty's complexion acts sometimes! Did you ever notice that it gets just the color of her hair, so she looks all alike? I think it is most curious!"

"The hard part is," said the girl who was helping dispose of the candy, "that you can't get away from a bad complexion. There isn't a thing you can do to distract attention from it, because it is the most prominent thing—"

"I'm certainly much obliged to you!" interrupted the owner of the complexion that was under discussion. "I'm glad to find out that you regard me as a human monstrosity! My complexion may not be the finest on earth, but I guess I'd pass in a crowd! It isn't necessary to be an insipid pink and white to be good looking! Artists have been known to rave over the color symphony of a girl like me—all a faint golden-brown, they call it!"

"Anyhow," said the girl who was helping to dispose of the candy, "I'm glad I'm sensible enough to realize my weak points and not so foolish as to think I'm a regular Venus! What I'd like to change is my figure. I suppose you've noticed—"

"Oh, indeed, we have!" interrupted the girl in brown. "But I wouldn't worry over it so much. Of course, the fashions are bound to change some day and I suppose when it's no longer the style to look like a lath it'll be bad for you, but just now you're all right. You're just the thing! Why, everybody is simply trying to look shapeless and lank."

"I should think you would be glad," said the girl with the chocolate, "to know that you have absolutely no hips nor any shape at all."

"Thank you so much!" tartly said the young woman under discussion. "If you can't appreciate a figure that is svelte and willowy I suppose that's your misfortune! It takes a connoisseur to admire some types of beauty—types out of the ordinary! Since you are beefy and billowy I suppose in self-defense you have to run down everybody else! Thank goodness, I am what I am!"

"Well, anyhow," sighed the girl in brown, "barring my hair and eyes, my complexion and teeth and figure and ears and nose, I think I'm rather good looking! I'm really sorry for you unfortunately!"

Long Trip for Submarines.

When Jules Verne wrote "Forty Thousand Leagues Under the Sea" few of his readers imagined that his wild idea would be accomplished within their lifetime, yet two submarines have started from Portsmouth, England, for Australia, a distance of 13,000 miles, which they will accomplish under their own power, created by oil-driven engines. They are scheduled to reach Australia about May 18, which allows for no loss of time from start to finish. Each boat has oil engines of 1,600-horsepower, calculated to develop 360 revolutions per minute, and will carry 11,000 gallons of paraffin as fuel and 1,500 gallons of lubricating oil. They have as armaments four torpedo tubes, and on arrival will be fitted with wireless telegraphy. They are to be known as AEL and AEE, being of the E class. They will be escorted as far as Singapore by his majesty's ship Eclipse.

Good Word for the Grass-Widower.

"No one seems to dwell on the charms of the grass-widower; and of all men, he is the most attractive. He hasn't a wife in his immediate vicinity to demand all his attentions; he hasn't the consciousness of his own eligibility like the average bachelor, nor the shadow of a dead romance about him like a bona-fide widower. In fact, for ordinary social purposes there's nothing so convenient or charming as the grass-widower,"

Mararet Kirby.

Paul Kennedy came home last week from Mt. Airy, Ga., where he has been for several weeks engaged in packing peaches.

Mrs. L. M. Fouché arrived here Saturday from Columbia accompanied by her grand son, Master Renwick Bradley who has been spending some time in Columbia. Mrs. Fouché will be the guest of her daughter, Mrs. J. F. Bradley for two weeks.

Mr. and Mrs. Will Taggart of New Orleans, who have been visiting at the home of Mr. and Mrs. James Chalmers left yesterday for Lowndesville.

Mrs. McKleski and children spent the week-end with relatives near Antreville.

Little Miss Florence Neuffer is entertaining quite a number of little girls.

Mrs. J. Foster Barnwell entertained Mrs. Bacot on Monday morning at Auction Bridge.

Miss Latimer was hostess at the regular meeting of the Ladies Bridge Club on Friday afternoon. Miss Latimer is ever a most charming hostess, and was especially so on this afternoon. Her apartments were very attractively arranged for six tables. After the games delicious ice cream and cake was served. Punch was served from a table in the hall to the guests as they arrived by Miss Esther Graydon.

SOW More Grain

If every farmer will sow five acres of oats to the plow, and three acres of wheat to the plow, on ground that is well prepared and well fertilized, he will make enough wheat and oats to do him.

The corn crop is likely to be short in this section as the seasons have not been favorable for making corn. If the war in Europe continues for a long time, there will be a tremendous amount of corn and wheat and oats exported to Europe and this will make corn, wheat and oats high.

September is a good time to sow oats. Prepare the ground carefully and thoroughly before you get to picking cotton, and fertilize it with about 300 pounds to the acre of say 10-1-3 or 10-1-4, your oats will get well rooted before the cold weather comes on and if sown in the drill it is about as sure a crop as you can plant. These oats will come in early next spring and will help out a short corn crop.

Now and then you hear of a farmer sowing oats in August, and we believe the August sowing always makes a good crop.

September is a capital time to sow oats and we believe it will pay you mighty well to sow some this fall.

It always pays to prepare your land well, and to fertilize it well.
